**Traders say dealing systems spur currency volatility.**  
Williams, Linda  
Computers in Banking, v5, n1, p11(2)  
Jan, 1988  
ISSN: 0742-6496 LANGUAGE: ENGLISH RECORD TYPE: FULLTEXT; ABSTRACT  
WORD COUNT: 1406 LINE COUNT: 00109

...ABSTRACT: though computer systems have been widely used now for more than a decade, the links **between** back offices and **trading rooms** are

only now being realized, and **on - line trading** systems are just beginning to accommodate traders needs. Anthony Herriott of Chemical Bank agrees that today's intricate global currency **exchange** market couldn't exist without **computerization**. There are those who argue that an over-reliance on incoming news can lead to...

... and they have been in wide use for more than a decade. But the links **between** back offices and **trading rooms** are only now being realized, and **on - line trading** systems are just beginning to accommodate traders' needs.

Many traders can remember the days when...

**UK Financial Services Act sparks development of compliance systems**

Anonymous

Electronic Banking & Finance, v5, n1, p7-8, Mar 1988 LANGUAGE: English

RECORD TYPE: Abstract

ABSTRACT: Under the UK Financial Services Act, British investment advisors had to register with self-regulatory **organizations** by February 27, 1988, in order "to protect **investors** from shady or careless **dealings** ." **Computerized** compliance systems such as LaserWatch must be in place by April 1988, when the law...

...with the Unify database. Transaction data is downloaded daily and reports are then generated. The **Mark I** version **costs** 95,000-110,000 pounds.

**Comments on 'Transaction Costs and Networks.'**

Jarillo, J. Carlos

Strategic Management Journal, v11, n6, p497(3)

Oct, 1990

ISSN: 0143-2095

LANGUAGE: English

RECORD TYPE: Abstract

ABSTRACT: Keith J. Blois' research **indicated** that using transaction **costs** to analyze industrial networks may not have been justified, but no alternative methods were suggested. Two factors contribute to the existence of **networks** : the lowering of **transaction** costs and the efficiency of conducting activities in **separate** entities. Using **transaction** costs to analyze **networks** provides useful information about networks, which have not received much theoretical consideration.

**The Trader: From Pit to Screen**

Goodman, Ann

Wall Street Computer Review v9n2 PP: 18-19 Nov 1991

ISSN: 0738-4343 JRNL CODE: WSC

...ABSTRACT: African Futures Exchange. She is among traders who are making the switch from floor- to **screen**-based **trading**, as **electronic** systems are integrated into the **trading** world. The trend has predominated in Europe and is spreading to the US. Many traders, like Slot, find the 2 trading experiences radically different, while others find striking similarities **between floor** - and **screen**-based trading. Both types of trading require the ability to quickly **price** and recognize **market**-generated opportunities without risking a lot of money. Marco Bracco, a market trader for Commerzbank (Frankfurt, Germany) on the Deutsche Terminborse, made the transition without any trouble. **Screen**-based trading is more isolated, but provides more information at one's fingertips. Bracco notes that one advantage of the **screen** is that the trader can monitor more than one market from a single location.
